

TruSense Forklift

Powered by Microshare®

Forklifts are a leading cause of workplace injuries, particularly for pedestrians. TruSense Forklift is a revolutionary wearable that uses real-time sensing technology to alert workers before accidents happen, giving them the awareness they need to stay safe.

TruSense vibrates and BUZZES to alert forklift operators and nearby workers within 6 feet, allowing pedestrians to move away faster than a forklift can stop or pivot.

- ✓ Affordable, high-impact safety solution
- ✓ Compatible with all forklift and equipment models
- ✓ Quick and easy setup—operational in days
- ✓ Minimizes injuries, downtime, and insurance costs
- ✓ Supported by Truline—a trusted safety leader

Collisions between Forklifts and Pedestrians pose a Daily Risk

OSHA estimates
35K to 62K
forklift-related injuries annually.

36%
of forklift fatalities involve
pedestrians.

11% of **855,900**
U.S. forklifts are
in accidents yearly.

\$41,003
is the average cost of a
workers' compensation claim.

30%
of all forklift accidents
occur in warehouses.

\$13,494
is the average cost of an
OSHA safety violation.

Ensure Safety with
TruSense Forklift technology.
